BioLearn® - How the Drug Discovery Industry Works

This course represents an excellent opportunity for staff who are new to the drug discovery industry, those in non-scientific roles or beginning careers as a scientist to gain or develop an in depth knowledge of the sector.

About:

During this half-day course the structure and commercial environment of the biopharmaceutical industry including key technical aspects of the drug development process will be covered.

This course would suit:

Non-scientists: to help build overarching knowledge of this sector and help improve confidence for staff in handling future projects.

Scientists: the overview of the industry structure and processes covered in the course will still be useful for scientists and engineers who wish to familiarise themselves with the industry.

Date and time:

This course will take place on Tuesday 22 January 2019 from 12:30-17:00. Registration will open at 12:00.

Course costs:
